MeowSai | Sai Aung Kaung Myat

Summary

Highly **experienced Go (Golang) developer** with a focus on crafting **robust software solutions** and **cloud-native microservices architecture**. I'm passionate about technical leadership, effective project management, and continuously adopting new technologies to design innovative systems.

Experience

Global Private Technology Co.
Backend Developer
Philippines (Remote)
November 2024 - September 2025

- Developed new features and maintained the codebase for a web application's backend.
- Led the successful migration of a core application from Java to Go, enhancing efficiency and scalability.
- Managed teams of developers and collaborated with cross-functional teams to deliver high-quality software solutions.
- Participated in code reviews and provided constructive feedback to fellow developers, ensuring code quality and adherence to best practices.

Myanmar Software Integrated Solutions
Cloud Developer
Yangon, Myanmar
April 2024 - August 2024

- Introduced and containerized some of the Company's Project for faster deployment
- Set up a Gitlab CI/CD Pipeline for Company's Dev Team.
- Maintained and monitored cloud servers.
- Identified and solved cloud issues requested by both internal and external users.
- Developed and automated some responsibilities.

GoPedagogy Company
Backend/Devops Developer
Singapore(Remote)
April 2022 - December 2023

- Orchestrated the setup of a cluster infrastructure featuring nginx and traefik.
- Developed essential Go back-end services for the core application.
- Conducted research on emerging technologies for future integration.
- Implemented a robust CI/CD pipeline in Gitlab to streamline development workflows.
- Deployed dashboards using AWS CloudFront for improved accessibility and performance.

Galaxie AI Company
Backend Developer (Intern)
Yangon (Remote)
May 2021 - July 2021

- Installed and configured Eclipse Che Server to enhance the development environment for the company.
- Engineered a RESTful web service that leverages Terraform to dynamically provision EC2 instances on the Amazon Web Services (AWS) platform.

Projects

Dynamic Form Telegram Bot
A powerful Telegram bot that dynamically generates forms based on a provided JSON configuration. It supports storing responses in MySQL, PostgreSQL, or MongoDB and can send data via a webhook.

Telegram, Golang, Postgres, MySQL, Mongo, SQLite

https://github.com/MeowSaiGithub/tg-form-builder

go-es

Go-ES is a microservice written in Go that provides a full-text search functionality using Elastic Search. It allows users to perform various operations such as indexing, searching, and retrieving documents. This is for more simpler usage than elastic for whom do not want to dive deep into elastic search echo system.

Golang, Docker, Elastic Search

https://github.com/MeowSaiGithub/go-es

CSGuard
csguard is a cli tool for calculating & validating checksum

Go, CLI

https://github.com/MeowSaiGithub/csguard

GDHost
A deployment hosting service with Docker backend.

The **GDHost** is a middleware service that will allow user to upload and host application using docker.

Go, Docker, Dockerfile, Mongo Database

https://github.com/MeowSaiGithub/GDHost

School Management System
School Management System

This project is a collection of micro-services with event-driven architecture. Some of Micro-services worked on this project are

1. Chat service: Manage real-time messaging between users.
2. Email service: Automates the sending of custom emails.
3. File service: Manages file operations such as upload, download and storage.
4. Domain service: Manages domain records.
5. Posts service: Handles creation, editing and deletion of user posts.
6. Authorization service: Provides security by managing use authentication and authorization.
7. Notification service: Sends notifications to user through web-socket and push.

Go, Websocket, Kafka, SMTP, AWS SES, AWS S3, REST API, AWS Route53, JWT, Keycloak, PostgresSQL, Traefik, FCM, Mongo Database, AWS Lambda, AWS CloudFront, Kubernetes, Helm charts

Education

University of Computer Studies
Computer Science

KBTC - School of IT
Computer Science

Skills

Golang	SQL Databases	Mongo Database	Jira
AWS Cloud Services	Docker/Kubernetes	Git	Apache Kafka
FCM	Gitlab CI/CD	Reverse Proxy (Nginx/Traefik)	Redis
Neo4j	Helm Chart	Trivy	Apache Web Server

Certifications

AWS Solution Architect Associate
Amazon Web Services Training and Certification
July 2025

Neo4j Certified Professional
Neo4j Academy
June 2023

Docker Training Course for the Absolute Beginner
Kodekloud

Learning Linux Basics Course & Labs
KodeKloud
